

# Pediatric and Adolescent Sports Medicine Update

September 2011

## AllSports Medicine Program at All Children's Hospital

AllSports Medicine is the pediatric and adolescent Sports Medicine program at All Children's Hospital, developed to meet the special needs of children and teens with sports injuries. Our multidisciplinary program is the only comprehensive sports medicine program in the Tampa Bay area focused solely on the care of young athletes. Pediatric specialty services including orthopaedic surgery, physical therapy, occupational therapy, cardiology, emergency medicine, radiology, and neurosurgery are available to patients as needed, according to the type of injury and the specific needs of each patient.

Sports medicine surgeon Drew E. Warnick, M.D., is the surgical director of the program and is fellowship trained in pediatric and adolescent sports medicine. He is trained in cutting-edge techniques in sports surgery for children and adolescents. This provides focused expertise to maximize recovery in young athletes who sustain injuries.

### Orthopaedic sports medicine services include:

- Comprehensive diagnosis and treatment of all athletic injuries in children, adolescents and young adults.
- Arthroscopic and minimally invasive surgical techniques for the hip, knee, ankle, shoulder and elbow.
- Extensive experience in the treatment of all fractures sustained during athletic activity.
- For emergent injuries, our surgeons provide 24-hour, seven-days-a-week emergency room coverage at All Children's Hospital– the only hospital in the Tampa Bay area to have an emergency room continuously covered by fellowship trained pediatric orthopaedic surgeons.

# Pediatric and Adolescent **Sports** Medicine Update

**September 2011**

## Sports rehabilitation program:

Our sports rehabilitation program is a physical and occupational therapy program specifically designed for children and adolescents with athletic injuries. All Children's therapists blend their skills in sports medicine and their unique knowledge of pediatric growth and development to provide comprehensive care for the young athlete.

## Services include:

- One-on-one assessment by a pediatric therapist focusing on the athlete's maturity level, skill level and performance goals.
- Age-appropriate and injury-specific rehabilitation protocols designed to help athletes return to sports participation in a timely manner.
- Individualized treatment to return the athlete back to his/her sport in healthy condition, prepared with the knowledge and skill to avoid re-injury.

**Referrals for sports rehabilitation or other specialties  
can be made by calling 727-76-SPORT**
